EDUCATIONAL GOALS AND EXPECTED LEARNING OUTCOMES:

The purpose of the course is to give students knowledge in the application of advanced tools of strategic planning and analysis and cost control.

The main skills are:

- Knowledge of the more advanced techniques of financial control, referring in particular to the multidimensional models.
- Ability to apply to specific problems the right tool for their solution.
- Ability to present and communicate to the different levels of the firm the result of its own work (about the control systems implementation process) explaining and justifying its own choices.
- Skill to implement the new control instruments in a real firm context.

PRE-REQUIREMENTS:

Successfully passing the exam Analysis and Cost accounting

SYLLABUS:

The course covers the following topics:

### TEACHING METHODS:
Theoretical lessons, case study

### EVALUATION METHODS:
Case study, Written examination, Oral examination

### TEXTBOOKS AND ON-LINE EDUCATIONAL MATERIAL:
Paper and additional readings indicated by the teacher.

### INTERACTION WITH STUDENTS:
At the beginning of the course, after describing the objectives, program and methods of verification, the teacher provides students teaching materials (web site). Simultaneously, it collects a list of students who intend to enroll in the course, together with name, serial number and email. In addition to weekly reception, the instructor is available at all times for a contact with the students, through their e-mail.
